CS I b Room Environment

Directions: This assignment requires you reflect on the room environment in which your Verification Visit Observation will occur.

Be sure to save this assignment to print off and include in your **Professional Portfolio**.

Our classroom is designed to improve the children's knowledge and provide them with materials that will help them in everyday life. A safe and healthy environment is beneficial to the children's needs. Our classroom is divided with every learning subject such as Math, science, art, reading, snack table (kitchen), and cleaning materials. We have shelves that contain the proper materials for each subject. We have tables around the classroom so the kids can sit down and do their work. Our kitchen space has a snack table so the kids can eat their snack. Next to the snack table theirs a shelf with cups, plates, and utensils. Those things are essential in life. The room was not designed by me, but I feel like I wouldn't change a thing. The room is well organized and has important materials to help the children in their education.
