

## Tab D - CS II b Learning Experiences (from RC II)

**Directions:** Pick another one of the nine learning experiences you chose for your Resource Collection II. How does this experience reflect your personal philosophy of how you support young children's cognitive development?

After reflecting on my lesson plan about jelly bean math I can see that it supports children understanding not only basic math but also reasoning and cognitive functioning. I believe supporting children's cognitive development is one of our responsibilities as an educator because children will use this important skill set in all areas of their lives.
