

Tab D - CS II c Learning Experiences (from RC II)

Directions: Pick a third learning experience you chose for your Resource Collection II. How does this experience reflect your personal philosophy of how you support young children's creative development?

After reflecting on the finger-painting lesson plan, I can see that my love of art and expressing oneself comes through. I think that using open-ended art projects supports my desire to help children appreciate their own creativity and thus increasing their self-confidence. Instead of placing requirements on their art to look a certain way I like to let them discover their own style, favorite colors, and to even make mistakes to better learn about the artistic process.
